

Maximum performance for your production.

Ensure that your production runs perfectly. Whether technical cleaning or maintenance, we service, repair, clean and optimize all components associated with your entire manufacturing process. To allow you to focus fully on your business, we plan and realize customized maintenance concepts. For minimal downtimes - today and in the future.

Everything from a single source. And with just one goal in mind: Your added value

- Regular cleaning of your facilities and machines **for smooth manufacturing processes**
- Customized maintenance concepts **to maintain the value of machines and equipment**
- Fast elimination of faults **for maximum productivity**
- Monitoring of critical areas to **minimize the risk of breakdowns**
- Fast response times **for optimum plant availability**
- Complete service from a single source, **so that you can focus on what matters**

Production Equipment Maintenance

Ensure the performance of your manufacturing facilities. We plan, realize and organize customized maintenance concepts for technical and administrative procedures. Our services include inspection, maintenance and repairs as well as the ongoing improvement of individual machines, complex processes and complete processing systems.

Scope of services

- Inspection and preventive maintenance
- Planned and corrective maintenance
- Break down analysis
- TPM and shopfloor management
- Optimization and overhaul of machinery
- Regulatory inspections
- Workshop management incl. manufacture of spare parts and equipment
- Spare parts management
- Tool management
- Fluid management

Technical Cleaning

Maintain the value of your facility. With decades of experience, modern expertise and cutting-edge cleaning processes we realize tailor-made cleaning concepts for your production. Using special equipment, machines and methods, we clean even hard-to-access parts not just reliably, fast and efficiently but also in a way that protects the material and is environmentally compatible.

Scope of services

- Machine cleaning
- Paint shop cleaning
- Control cabinet cleaning
- Special project cleaning
- Paint stripping of skids and fixtures
- Deep cleaning

Intelligent cleaning using protective procedures

Dry ice

Fast, dry and environmentally compatible. Perfect for areas where water must not be used. No disassembly, wear-free and no chemicals.

- Motors
- Electrical installations
- Switchgear cabinets
- Crimping tools
- Welding robots

Ultra High Pressure Water Blasting

Efficient, gentle on materials and waste-free. With water pressures of up to 2,500 bar, no prior disassembly necessary, non-abrasive and does not cause special waste.

- Spray painting booths
- Water baffles
- Tank cleaning (with physical tank entry)
- Cleaning of gratings (little water)
