Leadec China receives JLRQ certificate of Chery Jaguar Land Rover

Shanghai/China, January, 16th, 2018 – Leadec China awarded important supplier quality certificate by Chery Jaguar Land Rover (CJLR).

JLRQ is CJLR's supplier management system for key performance indicators (KPI). It assesses the performance of suppliers on capacity, KPI fulfilment and production site assessment.

Leadec China has provided wheel and tyre assembly services to CJLR from 2013, introducing the British automatic assemble lines. The plant spans over 5,000 square meters and is equipped with the latest manufacturing execution system enabling 100% traceability of all assembled wheels and tyres. The fully automatic wheel and tyre assembly production operates six days a week with two shifts per day fulfilling the high demands of CJLR. Leadec supplies all assemblies in just-in-sequence (JIS) delivery mode directly to the CJLR vehicle assembly plant.

York Cui, site manager of Leadec at Changshu: "The achievement of the JLRQ award marks a significant milestone in achieving superior supply excellence of which we are very proud. We would like to extend our gratitude to all the hard working and committed employees". And Florian Gruss, Business Development Director at Leadec China, adds: "This award is an encouragement for the future. It shows Leadec as a partner of service excellence is going the extra mile for its customers."

The JLRQ award acknowledges the continued and sustainable high quality service provided by Leadec China in the past four years. Eric Li, General Manager of Operation at Leadec China: "It took our field team nearly two years to prepare for the final JLRQ audits and we are proud of being the 1st JLRQ award winner among all JIS suppliers of CJLR."

Leadec China is providing wheel and tyre assembly, technical facility management and production equipment maintenance services at CJLR in Changshu.

About Leadec

As a leading provider of technical services, Leadec supports the entire production process of the automotive and manufacturing industries. The company, which is headquartered in Stuttgart, employs around 18,000 people worldwide. For more than 50 years, Leadec has been supporting major car manufacturers, automotive suppliers and other manufacturing companies along the entire supply chain. The service provider deploys permanent teams in the facilities and plants of its customers but also has 200 of its own locations.

Leadec's global services comprise: Install (installation and automation, disassembly and reassembly), Maintain (production maintenance and technical cleaning), Support (IFM/TFM and internal logistics) and Optimize (process engineering, digital services and big data analyses).
