Leadec and GETEC enter into strategic partnership

Stuttgart/Magdeburg, 03/06/2020 – The GETEC Group and the Leadec Group, two leading industrial service providers worldwide, start a global cooperation. The aim is to support the mutual customers on their way to the “green factory of the future” with integrated and sustainable energy solutions and innovative modernization and maintenance concepts from one source.

Leadec and GETEC combine their strengths in the cooperation in order to create synergies and unlock additional potential with mutual customers to optimize energy solutions and plants towards more sustainability, efficiency and digitization. GETEC is a one-stop shop for sustainable and efficient energy solutions precisely tailored to the customer’s needs. Leadec contributes its operator expertise in technical facility management and production facilities for everything to do with preventive maintenance and sustainable modernization of machinery. Together they ensure a substantial reduction of the carbon footprint, considerable savings on energy and operating costs and a more resource-friendly plant utilization for their customers.

“The world of tomorrow is smart, green and efficient. GETEC and Leadec are already working together in a trusting relationship at many industrial customers. We share the common goal of developing efficient, scalable and sustainable services and solutions for our customers and to support them in achieving a ‘zero impact production.’ Together with Leadec we can further expand our solution expertise and draw on a wealth of experience in the manufacturing industries,” says Thomas Wagner, CEO of the GETEC Group.

“The entire manufacturing industry is characterized by a strong transformation. E-mobility, shared services or connectivity are only a few of the catchwords that describe this process. At the same time, companies are changing their production, in some cases drastically, as regards emissions. The factory of tomorrow is therefore connected as well as climate neutral. And this is exactly where we utilize our advantages as partners by ideally supporting our customers with a full-service package,” explains Markus Glaser-Gallion, CEO of the Leadec Group.

About Leadec

Leadec is the leading provider of technical services for the automotive and manufacturing industries. The company, which is headquartered in Stuttgart, employs about 20,000 people worldwide. In 2019 Leadec earned sales of around EUR 900 million. For more than 50 years, Leadec has been supporting its customers along the entire production supply chain. The service provider is based at more than 300 sites, often directly at the customers' plants and facilities.

Leadec's global services comprise: Engineer (Production Planning & Optimization, Automation and Production IT), Install (Electrical Installation, Mechanical Installation and Relocation), Maintain (Production Equipment Maintenance and Technical Cleaning), Support (Technical Facility Management, Infrastructural Facility Management and Logistics) as well as other local services. The services are provided either in projects or permanently on site at the customer's premises.
