Leadec places emphasis on vocational training even in corona crisis

Stuttgart, 10/6/20 – 38 young people have started their first vocational training year at Leadec, a leading provider of technical services in the manufacturing industries. 32 vocational training supervisors are responsible for training in 17 different occupations at 15 Leadec sites in Germany. The new training year starts under normal conditions.

A total of around 100 trainees are currently completing their training at Leadec. “We always need good junior staff and therefore invest in their training on a long-term basis. And corona has not changed this,” explains Claudia Gröner-Braun, Senior Vice President HR Europe Division at Leadec. “As a provider of technical services, we must always be up to date with the latest developments for our customers, and our teams are working on continuously developing themselves further.”

The spectrum of vocational trainings at Leadec ranges from electronics technician for various fields to IT specialist, mechatronic technician, metal worker, construction, cutting and industrial mechanic to office management assistant. The work is mainly carried out in the automotive and manufacturing industries, often directly at the customers’ plants and facilities.

Even during the lockdown, all sites were able to continue training. The program included assignments in the training workshop and in companies as well as tasks that were worked on at home. During this time, the vocational schools imparted the learning content via various online models. The new training year starts under normal conditions – in compliance with the applicable distance and hygiene rules.

“At Leadec, trainees get exciting insights into industrial production right from the start because we support our customers along the entire value chain. Installation, logistics, facility management or maintenance – we are at home in many areas because our heart beats for the factory,” says Claudia Gröner-Braun.

After completing their vocational training program, trainees often continue directly with Leadec. Whether it is further training to become a technician or master craftsman or a two-month break for a social project abroad

before starting regular employment with us – we make many things possible.

There are many opportunities for further development, not only for our own trainees. Leadec is also happy to employ trainees who have completed their training in another company. Especially electronic technicians for building services are currently being sought at many sites.

“The corona crisis has brought some companies into economic difficulties. Those who suffer are often the trainees who either cannot continue their training or are not taken on after completing their training. We are happy to offer these trainees a perspective at Leadec,” adds the HR manager.

About Leadec

Leadec is one of the leading providers of technical services for the automotive and manufacturing industries. The company, which is headquartered in Stuttgart, employs about 20,000 people worldwide. In 2019 Leadec earned sales of around EUR 900 million. For almost 60 years, Leadec has been supporting its customers along the entire production supply chain. The service provider is based at more than 300 sites, often directly at the customers' plants and facilities.

Leadec's global services comprise: Engineer (Production Planning & Optimization, Automation and Production IT), Install (Electrical Installation, Mechanical Installation and Relocation), Maintain (Production Equipment Maintenance and Technical Cleaning), Support (Technical Facility Management, Infrastructural Facility Management and Logistics) as well as other local services. The services are provided either in projects or permanently on site at the customer's premises.
