Highly dynamic production and process optimization: Leadec is certified COPA-DATA Bronze Partner

Stuttgart/Chemnitz, Germany, 03/16/2021 – Leadec is a COPA-DATA Bronze Partner, demonstrating its certified product knowledge and project experience with the Zenon software platform. Leadec uses this automation software to provide its customers with an integrated complete solution that connects the company from the sensor to the ERP system.

“Our customers need flexible and reliable processes with transparent data and efficient control. With Leadec as a certified COPA-DATA Partner, they receive a comprehensive solution from engineering to automated operation of manufacturing and infrastructure equipment. This enables them to reliably achieve their operational goals and realize optimization potential,” explains Dr. Achim Agostini, Executive President of the Global Automation & Engineering Division at Leadec.

Zenon was developed to make it easier to manage complexity in industrial and infrastructure environments. Leadec’s experts use the software platform for ergonomic and highly dynamic production and process optimization, in an extremely flexible manner and in different industries. Customers benefit from the company’s comprehensive know-how in engineering, visualization and production data acquisition. Leadec accompanies them on the way to the Smart Factory to optimize their production and pave the way to Industry 4.0.

Zenon’s applications are as diverse as Leadec’s customers. As software in the pharmaceutical industry, for example, Zenon enables problem-free compliance with regulations such as FDA 21 CFR Part 11 at the click of a mouse. In the automotive industry, the Zenon solution scores particularly well with condition monitoring, and for customers in the energy & infrastructure sector it ensures regulated processes in energy production and distribution.

About Leadec

Leadec is the leading global service specialist for factories across their entire life cycle and related infrastructure. The company, which is headquartered in Stuttgart, employs about 20,000 people worldwide. In 2019 Leadec earned sales of around EUR 900 million. For almost 60 years, Leadec has been supporting its customers along the entire production supply chain. The service provider is based at more than 300 sites, often directly at the customers' plants and facilities.

Leadec's global services comprise: Engineer (Production Planning & Optimization, Automation and Production IT), Install (Electrical Installation, Mechanical Installation and Relocation), Maintain (Production Equipment Maintenance and Technical Cleaning), Support (Technical Facility Management, Infrastructural Facility Management and Logistics) as well as other local services. The Leadec.os digital business platform is used to record all processes end-to-end and integrate further digital services.
