Leadec: Integrated Facility Management for factories

Stuttgart, Germany, 01/24/23 – With its Integrated Facility Management offer developed specifically for manufacturing companies, Leadec fills the gap for technical services in the growing IFM market. Customers receive a one-stop solution across sites, regions, or countries, based on our technical expertise and reliable services covering the entire factory lifecycle.

“The future belongs to IFM. However, there are a lot of suppliers with a background in building management. Leadec, on the other hand, has 60 years of experience at more than 300 factories worldwide. Customers benefit from our technical expertise, wide range of services that we provide ourselves, and regional footprint,” says Markus Glaser-Gallion, CEO of Leadec.

Leadec’s IFM offering is a customized package of technical and soft FM services. It includes, for example, electrical installation and maintenance, heating, ventilation, air conditioning, lighting, compressed air, as well as janitorial services, landscaping and more.

Our Leadec.os digital platform is implemented as the central control platform and help desk. It is used to digitally manage all IFM service processes, and the status of each individual task is traceable in real time. This not only creates transparency, but also ensures paperless and legally compliant documentation.

Technical competence and experience

“We empower our customers to fully concentrate on their core business because they only have one interface to us as a reliable service partner. In our IFM offering, we bundle our services for the manufacturing industry, combine them with our digital solution, and offer them across sites,” adds Markus Glaser-Gallion.

The latest order proves that Integrated Facility Management is the way forward. In October 2022, Leadec won a multi-year contract for IFM in Mexico and Brazil with an international technology and service company.

About Leadec

Leadec is the leading global service specialist for factories across their entire life cycle and related infrastructure. The company, which is headquartered in Stuttgart, employs about 20,000 people worldwide. In 2021 Leadec earned sales of around EUR 940 million. For 60 years, Leadec has been supporting its customers along the entire production supply chain. The service provider is based at more than 300 sites, often directly at the customers' plants and facilities.

Leadec's global services comprise: Engineer (Production Planning & Optimization, Automation and Production IT), Install (Electrical Installation, Mechanical Installation and Relocation), Maintain (Production Equipment Maintenance and Technical Cleaning), Support (Technical Facility Management, Infrastructural Facility Management and Logistics) as well as other local services. The Leadec.os digital business platform is used to record all processes end-to-end and integrate further digital services.
