

**Your partner for every
industry.**
We love your factory.

leadec
Industrial Services

Who improves your efficiency? We do at Leadec.

In a way that is unique, Leadec combines the expertise, networking capacity and performance of a global player with the personal support of a regional partner on the ground. With a workforce of around 20,000 worldwide, we are represented at more than 250 locations on four continents, so we are always close to our customers wherever they are.

Global presence:

- Asia
- Europe
- North America
- South America

We consider every production scenario from the perspective of the plant operator and contribute industry and process expertise acquired through our more than 50 years of experience. To ensure that our customers have a genuine competitive edge, we are proactive and flexible, resolve sophisticated tasks with great technical expertise and consistently think outside the box. We are constantly looking to the future, so we do not just optimize existing technologies but also develop our own technical, organizational, analog and digital tools.

Because we know that challenging goals can only be achieved by focusing on the future and maintaining a high level of motivation. To allow us to become even better, we invest constantly in our technology, our processes and our personnel. Thanks to excellent data and knowledge management, our experience and expertise are available round the clock to our teams worldwide.

Our heart beats for your factory in the manufactur- ing industry.

Since 1962, Leadec has provided industrial services to well-known automobile manufacturers and their suppliers, one of the most competitive industries in the world. By following the expansion of our key customers over the years, Leadec developed its footprint continuously as well. Today we are able to offer customized service solutions as a partner on a global level. One of the most competitive industries in the world.

For several decades Leadec has transferred knowledge, skills and expertise from performing customized services in our customers' plants and factories. With our innovative solutions and great passion we keep the heart of your production efficient and strong. We offer our customers the same service standards in all sectors of the manufacturing industry worldwide.

Be it a new acquisition, relocation or modernization: We make sure your plant and equipment run smoothly – from assembly to installation to automation.

Industries, we work for:

- Automotive
- Line & Machine building
- Electronics
- White goods electrical equipment
- Aerospace
- Fabricated metal products
- Off-highway (Construction & Agriculture)
- Wood & Furniture
- Mobility & Transportation
- Chemical & Pharma
- Food
- Wheel & Tyre Producer

Industries, we work for.

The manufacturing industry.

Line & Machine building

For our line and machine building customers the top priority is to increase their plant and equipment's productivity to generate added value for the end customer. As a result, the challenge of continuously perfecting and developing further machines and machine tools is mounting. For you to be able to focus entirely on your business, we as a service specialist make sure that your production runs reliably, efficiently and economically – from assembly to installation to maintenance and automation.

Electronics

Characterized by innovation and product developments, the electronics industry may also be referred to as a changing industry. This market faces the challenge of meeting the rising demands on innovations' availability and quick succession in a digitized society. However, there is hardly any other industry that offers such a high potential for growth combined with relatively short innovation cycles. Remain a digital transformation pioneer and driver while our Leadec experts create the ideal conditions for your production and for reliable, efficient and economical manufacturing processes.

White goods electrical equipment

The appliance industry evolves around developing new products aimed at making the end consumer's life more comfortable. The white goods industry creates a sustainable added value for the consumer by introducing networking products. At the same time, it increases the innovation pressure within the sector. To grow successfully in this industry, our customers reduce their own risk by handing over responsibility for industrial services at the production plant. Because Leadec supports you in everything to do with production-related services.

Aerospace

Strict environmental requirements, rapid technological development combined with a long model half-life, and passengers' high requirements on safety: The aerospace industry faces demanding challenges every day and yet it is one of the most advanced industries in the world. To cope with growing demands reliably and successfully, you need a strong industrial service provider who takes the load off you. The services for the aerospace industry provided by Leadec employees ensure that your production runs flawlessly. As a result, you can strengthen your core business.

Industries, we work for.

The manufacturing industry.

Fabricated metal products

Growing quality demands and strict inspections by the authorities – these are the conditions under which our customers in the metal industry have to stand up to competitors. Leadec therefore offers you room for new ideas across the entire range of metal production. By providing our services at your production plant, we create an ideal working environment and make your production facilities flexible and effective. So that you can always focus on your core business.

Off-highway (Construction & Agriculture)

Digitization and the development of new technologies play a decisive role in the construction and farm machinery sector. Our customers in this industry aim at making their machines more efficient and productive by using digital components. For this reason, Leadec offers you optimal services for all activities not related to production – no matter where in the world you are. Because of our global presence and our comprehensive range of services, outsourcing services to us is the perfect relief for you.

Wood & Furniture

In the wood and furniture sector, decisive success factors are the companies' sense of reliability and their sustainable actions. In this sector, too, our specialized employees ensure stable and sustainable working conditions and the retention of your production facilities' value. Leave the responsibility for these activities with our experts to ensure the quality of your work and to reduce your company's risk.

Mobility & Transportation

The mobility and transportation industry is characterized by valid solutions based on continuous development and research activities. Leadec knows this industry's specific demands. It is our aim to offer our customers in the mobility and transportation sector an optimal service related to their production plant. Because if you have to put less energy into minor production processes, you will be able to invest more time in your core business in the long run.

Industries, we work for.

The manufacturing industry.

Chemical & Pharma

Trend-setting developments regarding medicines, fuels and biotechnologies reflect the chemical industry's dynamics. Since we as an industrial service provider see the whole picture, we can offer our customers the best solutions: competent advice, increasing quality of production performance, greater efficiency thanks to our reliable range of services. Because outsourcing industrial services frees up resources for the actual purpose of your business.

Food

Shorter production cycles combined with an increasing product variety – these are the requirements our customers in the food and beverage industry face every day. The top priorities in this industry: uncompromising safety and hygiene, and reliable traceability. Leadec's industrial services help increase your quality and productivity. We make sure that your production line runs smoothly and trouble free, allowing you to focus on your end customers' ever-growing expectations. This will improve your competitiveness and flexibility in the long run.

Wheel & Tyre Producer

The wheel and tyre producers' success depends on high-quality and durable materials as well as the end customer's safe and ideal driving experience. To be able to meet the high quality standard, many premium customers already outsource production-related industrial services to Leadec today. Production facilities which function reliably and flawlessly are the key to success in an industry in which just-in-time and just-in-sequence delivery are crucial.

Automotive

In today's world, the automotive industry is confronted with the task to develop increasingly lighter vehicles consuming less fuel and causing less emissions. Let Leadec's service capabilities work for you and fully focus on your end product! This means that you not only outsource work but also responsibility, resulting in a cost reduction.

What improves your efficiency? Our services.

<p>Overview of services</p> <p>We plan and optimize your complete production, the production IT as well as plant and equipment. Production optimization according to lean manufacturing methods is just as much a part of our assignments as major projects as general planner or the realization of customized automation solutions.</p> 	<p>Overview of services</p> <p>Make sure that you have the best technical environment to work in. Whether we are supporting you with a new acquisition, relocation or upgrade, we ensure the smooth operation of your production facilities and machines. So that you can concentrate fully on your business, we ensure that your manufacturing process is reliable, efficient and cost effective.</p> 	<p>Overview of services</p> <p>We make sure that your production runs perfectly, because we clean and maintain, repair and optimize all components relating to your entire production process. We plan and realize customized maintenance concepts. For minimal downtimes, today and in the future.</p> 	<p>Overview of services</p> <p>Exploit the potential of your manufacturing facility. Whether we are dealing with a building, building services facilities or surrounding grounds, we take responsibility for servicing, cleaning and internal processes. In doing so we always think and act in your best interest and resolve sophisticated tasks quickly, flexibly and competently. While you concentrate on your core business, we ensure an optimum production environment.</p> 

Our heart beats for quality and safety. We love your factory.

At Leadec we set great store by consistently high quality and safety and the environmentally compatible and sustainable performance of all work that needs to be done.

High level of safety at work

"Safety - it's your life!" is the title of Leadec's successful occupational safety initiative. The objective of this campaign is to improve work safety and reduce the accident rate. We have received numerous safety awards from our customers for this undertaking. The success of the initiative is substantiated by real results.

Certified quality

The guiding principle of our processes and work flows is to consistently meet high standards for quality, safety and sustainability.

Leadec is certified to, e.g., IATF 16949, ISO 9001, DIN EN ISO 9001 (quality), DIN EN ISO 14001 (environment) and OHSAS 18001 (occupational health and safety).
